14-16 JULY 2021

VIRTUAL EVENT

MEDICAL HISTORY AS MATERIAL HERITAGE OF HUMANITY CALL FOR GLOBAL SUPPORT

Francisco Hernández Altemir

Private Clinic - Drs. Hernandez, Zaragoza, Spain

Keywords: Medical History, Material Heritage Of Humanity, Global Support

Objectives: The first objective of this work is to claim and strengthen the value of the Medical History within the following domains also making use of the new technologies:

1. Welfare
2. Pedagogical
3. Research (through evidence)

The second objective is to safeguard the traditional value of the Medical History to consider it up to a legal document.

The third and most important objective, consequence of the previous two objectives, is to achieve that the Medical History is considered as Material Heritage of Humanity.

Materials and Methods: This proposal has been shared with several institutions.

The value of the content of the Medical History has been understood and embraced by those organizations who have expressed in written their support to the proposal.

The institutions that are supporting the initiative are at both, regional and national level, and it is foreseen to continue the exercise to increase the organizations expressing their agreement and support.

Precise names of supporting organizations (Professional colleges, academia, etc.) are not provided to respect the guidelines of the abstract submission which could lead to identification of the author/s.

The preparation of this e-poster also aims at increasing the scope of the proposal reaching international level.

Idea: Dr. Hernández Altemir; lyrics: Susana Hernández Montero; Music: Professor D. Marcos Castrillo Sampedro; Signed by: Blanca Lasheras Hernández

Results: As result of this work gathering the benefits and value of the Medical History, several institutions at regional and national level have confirmed and embraced in written their support to the proposal to consider the Medical History as Material Heritage of Humanity.

The project means as well a method of reaching an international standard of preparing the Medical History among the international community.

Conclusion: The main two conclusions are:

1. The value of the Medical History due to the information that contains (Clinic history, exploration, data content and scientific evidence) which supports the idea of considering it as Material Heritage of Humanity.
2. The need to standardize the content of the Medical History across countries.
